

NEW!

Accent II™

DISC LAMINATOR

PRIMERA
TECHNOLOGY, INC.

Make your inkjet printed CDs and DVDs glossy, highly water and scratch-resistant and secure!

Direct-to-disc inkjet printing is by far the most popular full-color method of labeling CDs and DVDs. It's easy to see why. Inkjet offers the brightest colors and sharpest text. The highest print resolutions. The lowest cost-per-disc and the most photo-realistic images possible.

But now, inkjet CD and DVD printing is about to get even better.

Introducing the Accent II™ Disc Laminator

Accent II is the world's first and only disc laminator. With Accent II, all of your discs can now be :

- Highly water-resistant
- Highly scratch-resistant
- UV resistant
- Glossy and bright
- Secure (with optional holographic film)

Accent II lays down a thin layer of tough, transparent film that's only a few microns thick. The finish is smooth, glossy and professional – in fact, far better than offset quality or even commercial screen-printing. You've never seen anything quite like it before!

One of the best things about Accent II is that it allows you to experience all the advantages of inkjet printing and still produce rugged, robust discs. With inkjet – versus other full-color labeling alternatives – you get incredible print resolutions of up to 4800 dpi. Photo-quality images that can't be beat. Bold, black text. And the widest variety of choices for blank CD and DVD media instead of just a few expensive "approved" discs.

Protect and Enhance Your Discs With ClearCoat™

ClearCoat is the most economical way to protect and enhance your discs. It laminates onto discs as clear as glass. Colors that already looked great become brighter and more vibrant than you'd ever thought possible. ClearCoat is also highly water-resistant and prevents discs from being scratched or smudged. Accent II literally "accents" your discs!

ClearCoat

Protect Your Valuable Content with AuthentiCoat™

Our exclusive AuthentiCoat overlaminates films deliver an entirely new solution to the duplication industry. Utilizing the latest in patented holographic technology, this unique film clearly tells the world that your discs are authentic. Both standard and custom holographic patterns are available. AuthentiCoat films have the same water and scratch resistance properties as ClearCoat films.

AuthentiCoat

Create Your Own Custom Hologram

Custom holographic images can include company or product logos, graphics or text. These unique images are very difficult to duplicate. They provide you with an authentication feature that will frustrate even the most skilled counterfeiter! But perhaps best of all is the high-end, professional image that you'll get on your CDs and DVDs. Just imagine having your company's logo in a holographic pattern on every disc you produce! There's even an optional "invisible ink" security option for text or graphics that's visible only under black light.

Accent II™
DISC LAMINATOR

High-Speed Autoloading

For the fastest possible throughput, add our new ADL-100 High-Speed Autoloader to your Accent II. The ADL-100 loads and unloads up to 100 discs at a time that have already been recorded and printed. Its unique, dual-picker mechanism delivers discs fast enough to automatically laminate 225 discs per hour!

New Features

Accent II is an advanced, second-generation disc laminator. It includes many additional features and benefits, including:

- **More Speed.** Discs now laminate at 2.2" per second (about 7 seconds each) - a speed increase of about 30% per disc from the original Accent II!
- **More Rugged.** Many key mechanical components have been strengthened for heavy-duty, higher-volume use.
- **More Accurate Temperatures.** And faster warm-up, too.
- **More Media.** Many printable-surface discs, depending upon relative humidity, can become slightly warped or "cupped." Accent II's redesigned laminating tray and disc clamping mechanism handles virtually all of these with ease.

Innovation from an Industry Leader

The Accent II Disc Laminator demonstrates once again why Primera is the industry's leading manufacturer of CD/DVD duplication and printing equipment. Primera has sales and support available in over 85 countries.

Specifications

Lamination Method:

Thermal transfer by heated mass-transfer roller

Overlaminate Films – 400 discs each:

- ClearCoat
- AuthenticCoat standard spinning CD design with word "Authorized"
- AuthenticCoat custom holographic designs for company logos, graphics and text

Lamination Speed:

2.2" per second maximum

Accepted Disc Sizes and Types:

120mm CDs or DVDs

Optional adapter kit for "hockey rink" business-card CDs and 80mm mini-CDs

System Requirements:

Pentium III/IV at 450 MHz or higher, 128MB RAM, one free USB 1.1 or 2.0 port

Interface:

Stand-alone or USB 1.1/2.0

Dimensions:

14.34" L x 13.53" W x 7.39"D

Weight:

25 lbs.

Agency Listings:

Safety: UL, UL-C, CE

Emissions: FCC Class B

Supply Voltage:

120 VAC @ 3 amps

220 VAC @ 1.5 amps

Supply Frequency:

50/60 Hz

Warranty:

One year; optional extended warranty plan available

Options:

ADL-100 High-Speed Autoloader with Stand
Business Card Adapter Kit
